Binghamton U receives $12.8 million energy grant

BINGHAMTON, N.Y. — Binghamton University is getting one of the largest research grants in the college’s history.

The NorthEast Center for Chemical Energy Storage at the state university has been awarded a $12.8 million, four-year federal grant.

The award was announced Wednesday and is one of 32 nationally from the federal government totaling $100 million to fund energy frontier research. Grantees will work on research projects for energy production, storage and use.

U.S. Energy Secretary Ernest Moniz says in a statement it will help “lay the foundation for our nation’s energy future.”
