SYRACUSE, N.Y. -- Onondaga Community College is introducing a one-year certificate program in advanced manufacturing and machining.

The one-year certificate program will be offered beginning this fall. The program will be free for displaced workers and unemployed veterans who can verify their employment status.

Students who successfully complete the advanced manufacturing and machining certificate program will be able to apply for positions as machinists, machine operators, tool and die makers, machine setters, and tool grinders.

Onondaga received $1.2 million for equipment and to develop a manufacturing curriculum, through the U.S. Department of Labor's Trade Adjustment Assistance Community College and Career Training Grants program.
toward credits.

Credits earned for the advanced manufacturing and machining certificate may also be applied to the **mechanical technology A.A.S. degree at Onondaga.**
