What is RSS and Why Do I Want It?

October 17th, 2006

The explosion of information on the web is a blessing and a curse, with too many sources and too little time. To keep up, many of us bookmark our favorite sites and hop from page to page, looking for the latest updates. Now with RSS, you can scan the latest information from all those sites from a single page.

RSS, which stands for Really Simple Syndication, is a way for content providers to disseminate updated information on the web. Much as you might subscribe to a print publication and receive the latest issue of the New York Times, with RSS you can subscribe to all or part of the digital version, and have it brought to your desktop. Do you also read the Washington Post, Time magazine, your favorite journal or Dilbert? Add them to your list of feeds and get the latest updates in the same place.

Using the XML format, websites provide an "easy button" (that ubiquitous orange icon,  **RSS**) which allows you to pull their content to you. You might wish to use a website that collects or aggregates your feeds such as bloglines, or you could insert the feeds as live bookmarks right into your personalized homepage or course authoring site.

AGGREGATORS & READERS

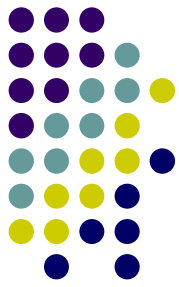

- My-----(Yahoo, Google, MSN, Optimum)
- Bloglines
- Google Reader
- NewzCrawler
- FeedDemon
- Newsgator
- Omea
- FeedBurner

The screenshot displays the JetBrains Omea Pro 2.0 application window. The interface is divided into several panes:

- Views and Categories:** A tree view on the left showing categories like 'Recent', 'Today (104)', 'Yesterday (138)', 'This week (239)', 'Last week (147)', 'This month (407)', 'Last month (194)', 'Unread (1392)', 'Deleted Resources', 'Flagged (2)', 'Annotated (1)', 'Clippings', and 'Categories'.
- Feeds:** A list of feeds including 'JetBrains (40)', 'Blogdigger search for Om', 'JetBlog :: News Bytes (4)', 'JetBrains News (6)', 'Omea News (8)', 'The Marketing Booth (7)', 'Misc (1135)', 'Boing Boing (55)', 'CNN.com (30)', 'FlexWiki (964)', 'RoboHelp Support (50)', 'shahine.com/omar/ (15)', 'The Office Weblog (11)', 'UIE Research Articles (10)', 'Digital Photography Review', 'Digital Web Magazine - What', and 'Eric.Weblog() (7)'.
- Feeds - The Office Weblog:** A list of news items with columns for 'Subject', 'Date', and 'Actions'. A yellow callout bubble says 'Read RSS & Atom feeds'. The selected item is 'Deep Impact: serious fireworks for this July 4th' dated 7/3/2005 12:53 AM.
- Article View:** The main pane shows the full text of the selected article, including a photo of the Deep Impact probe. The text reads: 'I know the posts are a bit off-topic today - hey, it's a holiday weekend. If you're a space nut, you know all about Deep Impact, NASA's program to toss a probe at a comet passing through the 'hood right about now. If you haven't heard about this project, [Space.com](#) has everything you need to know about this close encounter. You can download the [Comet Catcher Guide](#) (PDF), view videos titled (I am not making this up) "To Poke a Comet" and "Killer Comets and Ominous Asteroids", read news stories about the project and the comet, get a real-time countdown of the time until impact, and more. And yes Scoble, there is an [RSS feed](#).'
- Right Sidebar:** Shows 'From: Marc Orchant', 'Weblog: The Office Weblog', 'Category: Pics', and 'Actions' like 'Assign Categories...', 'Annotate Resource', 'Add Link...', 'Add to Workspace...', and 'New Task...'.

[Good Advice For Presenters And Writers](#)

via [ACRLog](#) by StevenB on Oct 24, 2006

Assuming you already have something worth writing or presenting, here is some worthwhile advice from Kathy Sierra in her post titled "[Where to Start](#)" over at [Creating Passionate Users](#). She offers a list of good ways to begin either a presentation or an article, but the gist of the post is to start anywhere except the beginning of the story. All

Newton-Raphson Method

By Jason Lin

Newton method is a method we can use to approximate the roots of an equation. This method can approach a root closer and closer for more accurate result.

“If x_1 is an approximation to a root of the equation $y = f(x)$, then

$$x_1 - \frac{f(x_1)}{f'(x_1)}$$

HOME ABOUT ASSIGNMENT OVERVIEW

OCTOBER 27TH, 2006

Assignment 1- Shawn Barca

1)a)it came out with 5076 hits for death and penalty and for death penalty with quotes it came out to be 4744 hits.

b) They were in the text of the document. And they were in separate parts of it.

Some documents had it adjacent and very few had it in the title.

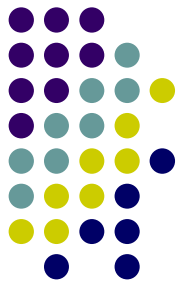

c) If you wanted to have exactly death penalty you would need to put it In quotes like "death penalty" because it would be seen as one word in the search.

Dan Fallu's Research

Caged Bird and the Road in Twentieth Century African-American Literature

From the slave narratives of the mid-nineteenth century to modern novels, travel has found its place in African American literature. In the United States in the nineteenth century were forced to run. Later, in the Great Migration, many African Americans left the farms and cities. In both cases African Americans sought a new life, and acceptance. Even in the twentieth century, travel finds its place in novels by Maya Angelou. In *Know Why the Caged Bird Sings*, Maya Angelou recounts her childhood, in which she is often on the move, being transferred between households to find acceptance. Traveling While Angelou searches for acceptance, the road becomes both a blessing and a curse. As Sandra G. Thelen notes, African Americans in literature who "aspire to relocate [...] seemed doomed to failure, turmoil, restlessness, alienation, or possibly death." The road has both positive and negative roles as it relates to acceptance and a sense of belonging.

- The Road is a symbol of oppression
 1. The journey from Africa into slavery
 2. Marguerite's (Maya Angelou's) train ride into the South

- The Road is directly connected to Marguerite's feeling that she does not belong
 1. She is moved from household to household before she can settle in
