

PRIORITY 5

Supporting the Department of Energy Office of Science

The Office of Science at the U.S. Department of Energy is the largest federal funder of basic physical sciences research in the world. Its investments power breakthroughs in quantum science, clean energy, advanced materials, and high-performance computing.

FY27 SUNY DOE OFFICE OF SCIENCE REQUEST

\$9.5 Billion

New York impact:

\$68.3 million awarded to New York institutions in FY25 - supporting a statewide network of research universities and colleges advancing fundamental discovery and workforce development in the physical sciences.

SUNY Impact:

More than \$15 million across SUNY campuses advancing quantum science, climate systems, energy storage, and workforce development including:

- **Stony Brook University \$10,449,949**
- **University at Buffalo \$3,171,000**
- **Binghamton University \$100,000**
- **University at Albany \$667,064**
- **College of Environmental Science and Forestry \$724,878**
- **Old Westbury \$618,363**
