The newly merged SUNY College of Nanoscale Science and Engineering, in Albany, New York, and SUNY Institute of Technology, in Marcy, New York, today announced a $10 million partnership with Korean semiconductor company, JUSUNG Engineering Co. Ltd.

The agreement will bring new nanoscale computer chip production equipment and staff from Korea to the Nanotech campus.

Equipment includes a JUSUNG etcher, that enables improved computer chip efficiency, which will set the standard for future production processes, according to a news release.

JUSUNG employees stationed at the Albany Nanotech Complex will work with college researchers and global corporate partners to develop new techniques for advanced technology nodes.
