* O*NET codes under the job family Construction (47) are generally not supported by SUNY unless the occupation/trade is to be used to 1) support an activity conducted within a facility owned or operated by the business entity employing the apprentice or 2) for the upkeep and maintenance of a facility owned or operated by the business entity employing the apprentice. Certain 47 O*NET codes are listed in the advanced manufacturing occupation category, for example the Plant Maintenance titles as well as Metal Refinisher, Plumber and Pipefitter, and Sheet Metal Worker because non-construction companies may support these occupations/trade titles. Support of 47 O*NET titles will be reviewed on a case-by-case basis.
